

SERUM AND WHOLE BLOOD SAMPLES – TEST REQUIREMENTS & SHIPPING INSTRUCTIONS

Test and Shipping Requirements:

The required collection tubes for each test or test panel are listed below. Tubes must be clearly labeled with the patient's first and last name, date of collection, and patient's date of birth.

[Required]:

- Samples should be collected on Monday, Tuesday, or Wednesday
- Samples should be shipped as soon as possible. **DO NOT** ship on Thursday or Friday. IGeX, Inc. is closed on weekends and cannot receive samples
- If samples are collected on Thursday or Friday (except CD57), refrigerate and ship samples on Monday
- Test Requisition Form must be completely filled out or it may result in the delay of testing
- Include prepayment (We accept Visa, MasterCard, Discover, or American Express)

[Exception]:

- CD57 samples are time sensitive and **MUST** be drawn on Monday, Tuesday, or Wednesday. Ship same day at room temperature
- CD57 samples that have been refrigerated or frozen will not be processed

*Please note: Test results will be available to your referring physician within 7-10 business days.
Patient statement will be mailed to patient for insurance.

Serum Draw in SST (serum separator tube), let specimen clot for 15 minutes, and spin (centrifuge) the specimen.

Whole Blood Draw blood in EDTA (lavender top Vacutainer tube), gently invert tube 6 times – **DO NOT SHAKE**

*Please note: Serum (SST) and whole blood (EDTA) specimens may be refrigerated if CD57 is not requested.
